Computer Technician

IPIL — Industrial Polytechnic Institute

Jesimiel Nóbrega

Fullstack Developer & Tech Lead

Fullstack engineer with proven experience building **large-scale public sector systems** in Angola. I lead technical teams in the design, architecture and continuous delivery of platforms serving thousands of users — focused on performance, reliability and sustainable code.

EXPERIENCE

- Senior Developer & Tech Lead** Present
SOSOFT LDA
Leading the technical team in the development of 3 nationwide and province-scale platforms — Acesso ETP, SIPE/SIPE-GPEL and IPIL Portal. Defining architecture, implementing CI/CD and ensuring continuous delivery to production.
- Fullstack Developer — Freelancer** Projects
ESSJ LDA
Embedded freelancer on Acesso ETP and the Exam Grading System — a nationwide digital assessment tool.
- Developer · Technical Support** 9 months
AGIM CORPORATE LDA
Technical support and internal solution development, including the AGIM Online Store — company e-commerce platform.

FEATURED PROJECTS

- A** **Acesso ETP** **NATIONAL** acessoetp.ao
Nationwide platform for access to technical-vocational education — applications, placement and vacancy management.
Laravel · Inertia · React · Python
- S** **SIPE · SIPE-GPEL** **PROVINCIAL** sipe.ao
Province-level information and management system, with a dedicated instance for the Provincial Government of Luanda.
Laravel · Inertia · React · Python
- I** **IPIL Portal** **LEADERSHIP** portal.ipil.ao
IPIL school-management portal — technical leadership and development team coordination.
Node.js · React · Python

Other projects: AGIM Online Store · Exam Grading · Document Management · Solid Waste Management. Internal Python scripts integrated into platforms.
